PROGRAMMING, SCRIPTING, & MARK-UP LANGUAGES

- Python
- PHP
- Java
- JavaScript
- TypeScript
- HTML
- CSS

WHAT I AM ABOUT

I started my programming career in 2014, since then I have jumped to different I.T. fields including web, desktop, and mobile dev to further gain knowledge and work experience.

For the past few years, I have experienced working in various designations. I have supervised small to medium development teams, lead and carry out operations and maintenance, and architect micro service applications.

Since the start of my professional programming career, I have worked with start-up companies in the Philippines and overseas while having several freelance projects which were able to push through the market.

My passion is programming. Solving problems and to constantly come up with ways to improve people's lives is my job and fulfillment.
